Overview

Simplify and make your data center change-ready. The HP 4Gb Virtual Connect Fibre Channel Module for the c-Class BladeSystem is the simplest, most flexible connection to your SAN fabrics. The HP 4Gb VC-FC Module is a new class of blade interconnect that simplifies server connections by cleanly separating the server enclosure from SAN, simplifies SAN fabrics by reducing cables without adding switches to the domain, and allows you to change servers in just minutes, not days The HP 4Gb Virtual Connect Fibre Channel Module for c-Class BladeSystem is an innovative, new class of integrated interconnects from HP.

What's New

- Support for HP BladeSystem c3000 Enclosure

Models

HP 4Gb Virtual Connect Fibre Channel Module for c-Class BladeSystem   409513-B21

At A Glance

Performance

- (4) 4Gb Auto-negotiating Fibre Channel uplinks connected to external SAN switches
- (16) 4Gb Auto-negotiating Fibre Channel downlink ports provide maximum HBA performance
- HBA Aggregation on uplinks ports using ANSI T11 standards-based N_Port ID Virtualization (NPIV) technology
- Extremely low latency throughput provides switch-like performance.

Management

- Managed with the Virtual Connect Ethernet Module
- Does not add to SAN switch domains or require traditional SAN management
- Appears as a pass-thru device to the SAN Manager

Virtual server profiles

- Ability to pre-configure server I/O connections
- Ability to move, add, or change servers on the fly
- Once defined, SAN Administrators don't have to be involved in server changes

Options

- HP 1/10Gb Virtual Connect Ethernet Module for c-Class BladeSystem
- HP 1/10Gb-F Virtual Connect Ethernet Module for c-Class BladeSystem

Overview

- (4) Fibre Channel SFP's included with the Virtual Connect Fibre Channel Module

Supported Products

Compatibility

HP ProLiant Servers   All HP ProLiant BladeSystem c-Class Server Blades with latest ROM updates

Supports all Server NIC's including LOM and Mezzanine card options

Virtual Connect requires the following minimum firmware levels:

- BL460c BIOS - System ROM version 2007.05.01 or later
- BL480c BIOS-System ROM version 2007.05.01 or later
- BL465c BIOS - System ROM version 2007.04.05 or later
- BL685c BIOS - System ROM version 2007.04.05 or later

Server Mezzanine Cards:

- QLogic QMH2462 4Gb FC HBA QLogic Firmware loaded when driver is loaded. Use QLogic BIOS version 1.26 (in Multiboot 1.63) or later
- HP Emulex LPe 1105-HP 4Gb FC BIOS version 6.00a2 (3.00a4) or later

For the latest additional information on required firmware versions and to download firmware upgrades, see the HP website http://www.hp.com/go/bladesystemupdates.

ProLiant BL c-Class Server Blade Enclosures   The HP BladeSystem c3000 and c7000 Enclosures have been designed up front with the Virtual Connect Architecture in mind incorporating the HP Onboard Administrator, ILO Management, and HP Management tools inside the Virtual Connect framework.

Virtual Connect requires the following minimum firmware levels:

- Single and redundant Onboard Administrators - (version 2.01 or later)
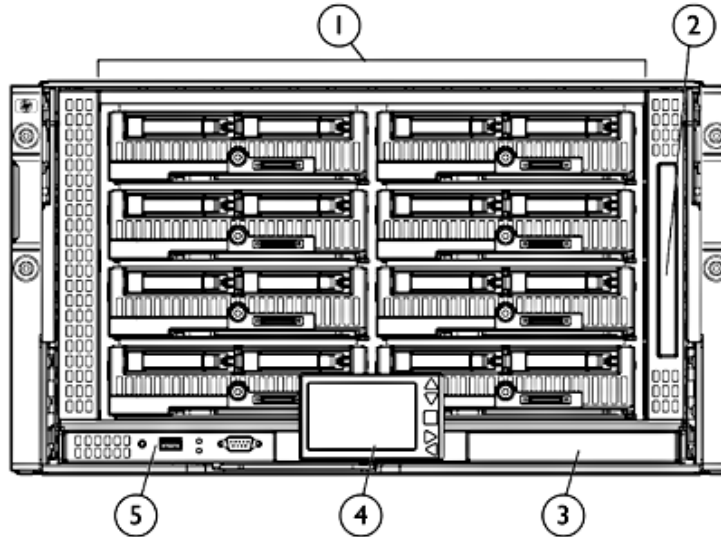

Supported Configurations
**HP BladeSystem c7000 Enclosure - Rear View**

1. Upper Fan System
2. Interconnect Bays 1 /2
3. Interconnect Bays 3 / 4
4. Interconnect Bays 5 / 6

5. Interconnect Bays 7 / 8
6. On Board Administrator
7. Lower Fan System
8. Rear Redundant Power Complex

Supported Products

HP BladeSystem c3000 Enclosure - Front View

1. Device Bays 1 thru 8
2. Enclosure DVD Drive
3. Standby Onboard Administrator (reserved for Future)

4. Insight Display
5. Active Onboard Administrator

HP BladeSystem c3000 Enclosure - Rear View

1. Local KVM interface (reserved for future)
2. Interconnect Bay 1
3. Active Cool Fans
4. Interconnect Bay 2
5. Enclosure Up-link and Service Port
6. Enclosure Down-link

7. iLO/Onboard Administrator Port
8. iLO/Onboard Administrator Port 2 (reserved for future)
9. Power Supplies
10. Interconnect Bay 4
11. Interconnect Bay 3

Supported Products

Mezzanines

Port Mapping

Port mapping differs slightly between full height and half height server blades due to the support for additional Mezzanine cards on the full height version.

HP has simplified the processes of mapping Mezzanine ports to switch ports by providing intelligent management tools via the Onboard Administrator and HP Insight Manager Software. The Onboard Administrator Guide, Enclosure Setup and Installation Guide provides detailed information on port mapping.

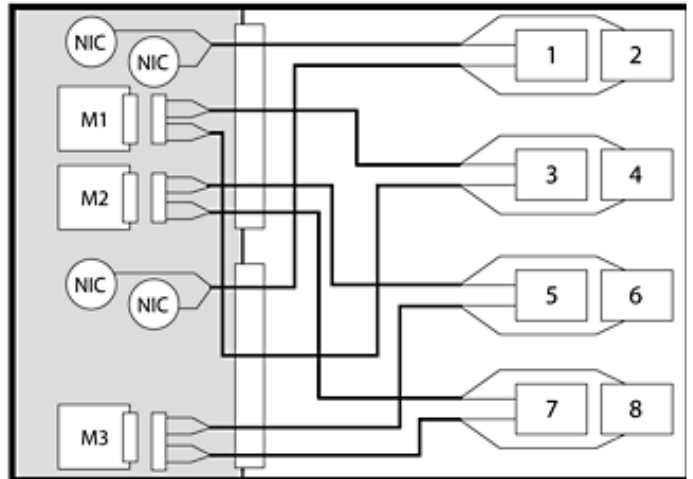

c7000 Half Height Server Blade

c7000 Full Height Sever Blade

c3000 Half Height Server Blade
c3000 Full Height Sever Blade

The following are supported configurations for the HP 4Gb Virtual Connect Fibre Channel Module. Please note that other interconnect options can be installed in the enclosure, but they do not inherit the benefits of Virtual Connect. Switches and Pass-Thru modules will operate per their default configurations. Any moves, adds, or changes to servers which are connected to non-Virtual Connect modules will require reconfiguration on the LAN and/or SAN. The Virtual Connect Manager will only manage Virtual Connect Modules.

The HP 4Gb VC-FC Module requires a Virtual Connect Ethernet Module installed in the system for management and administration. Version 1.1 or higher firmware is required on the Virtual Connect Ethernet Module in order to configure, manage, and administer Fibre Channel connections.

Stacking Configuration Stacking is only supported on Virtual Connect Ethernet Modules. The Virtual Connect Fibre Channel modules are managed via the Virtual Connect Ethernet Modules. The Virtual Connect firmware is dynamically mirrored between modules so all configuration data is updated simultaneously in a stack. Fibre Channel data packets are not transmitted between modules in a stacked configuration.

Service and Support, HP Care Pack and Warranty Information

Service and Support

This product is covered by a global limited warranty and supported by HP Services and a worldwide network of HP Authorized Channel Partners. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Additional support may be covered under the warranty or available for an additional fee. Enhancements to warranty services are available through HP Care Pack services or customized service agreements.

NOTE: Server Blade Interconnect Limited Warranty includes 1 year Parts, 1 year Labor, 1-year on-site support. Additional information regarding worldwide limited warranty and technical support is available at: http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html

HP services provide total care and support expertise with committed response designed to meet your IT and business needs.

To fully capitalize on your HP BladeSystem servers' capabilities requires a service partner who thoroughly understands your server technology and systems environment. HP Services, an industry leader in provision of multi vender support solutions provides a range of support services designed to meet the varying needs of business. Whether an SMB or large global corporation HP has a HP BadeSystem server support offer to help you speedily deploy and maximize system uptime.

Recommended Service - simplify ProLiant solution implementation, maintenance, and management.

- Support - 3-Year, 24x7, Same Business Day, 4-Hour response coverage
- Deployment Service - Installation and Start Up for HP BladeSystem Infrastructure

Enhanced Service - optimize service level to increase IT performance and availability.

- Support - -1-Year HP Proactive BladeSystem Service
- Deployment Service - Enhanced Network Installation and Start-up for HP BladeSystem Switches

Installation & Start-Up service for HP BladeSystem Infrastructure plus HP BladeSystem Enhanced Network Installation and Start-UP as per the Customer Description and/or Data Sheet. To be delivered on a scheduled basis 8am-5pm, M-F, excluding HP holidays.

Service and Support Offerings	**NOTE:** The HP Care Pack service part numbers below for ProLiant BL c-Class server blades, cover the server blade and all HP branded hardware options qualified for the server, purchased at the same time or afterwards, internal to the server.	
	Hardware Services On-site Service	
	4-Hour On-site Service, 5-Day x 13-Hour Coverage, 3 Years, Electronic	UE458E
	4-Hour On-site Service, 7-Day x 24-Hour Coverage, 3 Years, Electronic	UE459E
	6-Hour Call to Repair, On-site Service, 7-Day x 24-Hour Coverage, 3 Years, Electronic	UE460E
	Support Plus 24	
	Onsite HW support 24x7, 4hr response and Microsoft O/S SW Tech support offsite, onsite at HP's discretion, 24x7 2hr response time incl. HP holidays, Electronic	UE473E
	NOTE: HP Care Pack services for the c7000 and c3000 Enclosure cover the enclosure, power supplies and fans. HP qualified rack options are covered by these services when installed within the same rack. HP supported c-Class enclosure devices including pass thru, Ethernet interconnect and virtual connect modules are also covered by the c7000 and c3000 enclosure Care Pack services.	
	NOTE: SAN/Fabric switches for the HP c-Class BladeSystem are not covered under the c7000 and c3000 enclosure Care Packs, SAN/Fabric switches carry separate Care Packs. SAN/Fabric Switch Care Pack service level support should always be uplifted to match existing storage or server service level.	
	Hardware Services On-site Service	
	Next Business Day On-site Service, 5-Day x 9-Hour Coverage, 3 Years, Electronic **NOTE:** Uplifts the Ethernet devices to the same level of service as the c-class enclosure	UE477E
	4-Hour On-site Service, 5-Day x 13-Hour Coverage, 3 Years, Electronic	UE478E
	4-Hour On-site Service, 7-Day x 24-Hour Coverage, 3 Years, Electronic	UE479E
	6-Hour Call to Repair, On-site Service, 7-Day x 24-Hour Coverage, 3 Years, Electronic	UE480E
	Installation & Start-up Services

		Specification	10C to 35C (50F to 95F)
	Power Specification	12V @ 3A (36 W)	

Technical Specifications

Product Specifications Software	Industry Standard NPIV Support	The Virtual Connect Fibre Channel module works by aggregating multiple FC HBA ports over a single N-port uplink through the use of N_port_ID virtualization (NPIV). NPIV allows multiple distinguishable identities (multiple port WWNs and port IDs) over a single N-port connection. Most Fibre Channel SAN switch vendors have support for NPIV in their latest firmware release. By conforming to the NPIV standard, SAN equipment interoperability simplified. The Virtual Connect Fibre Channel Module Provides basic 4:1, 8:1, or 16:1 NPIV Fibre Channel concentration.
	Data Center Connectivity	Each Virtual Connect Fibre Channel module supports a single SAN fabric and is typically connected to a Fibre Channel switch that has been configured to run in NPIV mode. The 4 uplink ports are speed selectable from 1, 2, or 4Gb/s.
		The setup wizard allows SAN administrators to name the fabric that servers will connect into and set the oversubscription rate. Fibre Channel boot parameters and WWN administration are configurable options that can be integrated into server profiles.
		In an NPIV environment, there is an initial brief login function between the Virtual Connect Fibre Channel Module and the data center switch. Once completed, all HBA connections appear as though they are directly connected between the server and the SAN switch. The Virtual Connect Fibre Channel Module appears as a pass-thru device to the SAN, yet cables are reduced as high as 16:1
	Management Features	An HP 1/10Gb Virtual Connect Module must be present in order to configure the VC FC Modules. This provides a complete Virtual Connect Environment for the server connections.
		Simple and intuitive Graphical User Interface (GUI) for defining, configuring, and managing all elements of the Virtual Connect Domain.
		Setup Wizards for initial domain installation and configuration and network and SAN configuration.
		Comprehensive administration, definition, and management of Ethernet Networks, Shared Uplink Sets using VLANS, SAN Fabric management, and Server Profiles
		Domain Management of user accounts, enclosure, Virtual Connect domain settings, and firmware updates
		The location and status of Virtual Connect Modules in the HP c-Class Enclosure and Onboard Administrator can be viewed from the Hardware Status page. Including at-a-glance detailed information of the hardware elements via mouse-over pop-up windows.
		WWN Address Administration allows local administration of predefined WWN addresses ranges to allow pre-provisioning of SAN volumes.
		VC manager runs as a high-availability pair when HP 1/10Gb VC-Ethernet Modules are installed in adjacent bays. All configuration data is stored in flash memory and checkpointed to the standby module. Configurations can also be backed up to a workstation via the GUI.

Environment-friendly Products and Approach	**End-of-life Management and Recycling**	Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to http://www.hp.com/go/green. To recycle your product, please go to: http://www.hp.com/go/green or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner. The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/green. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
